

About

The SSA Company was founded in 1983. From many years we specialized in the production of measuring devices for automation and control. Our offer includes galvanic isolators, temperature transmitters, transducers of position and force, power supplies and relay modules as well. We have also developed a series of programming cables for popular SIEMENS SIMATIC PLCs.

Our policy is always focused on customers satisfaction. To meet their special requirements, we are able to customize our equipment to work with non-standard input and/or output ranges. All our products are covered extended extended, 3-years door-to-door warranty.

Among our clients there are companies in the energy, mining, metallurgy, food, utilities, chemical and many other industries.

We are looking forward to working with you!
